MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The following operating and financial review is intended to convey the Management's perspective on the financial and operating performance of the Company at the end of Financial Year 2016-17. This report should be used in conjunction with the Company's Financial Statements, the schedule and notes thereto and the other information included elsewhere in the report

(A) INDUSTRY STRUCTURE AND DEVELOPMENT:

India was the world's third-largest steel producer in 2016. @ The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output.

The Indian steel industry is very modern with state-of-the-art steel mills. It has always strived for continuous modernization and up-gradation of older plants and higher energy efficiency levels.

India's crude steel output grew 10.7 per cent year-on-year to 25.76 million tonnes (MT) during January-March 2017. India's finished steel exports rose 102.1 per cent to 8.24 MT, while imports fell by 36.6 per cent to 7.42 MT in 2016-17. India's steel exports rose 142 per cent in April 2017 to 747,000 tonnes over April 2016, while imports fell by 23 per cent to 504,000 tonnes in April 2017 over April 2016. Total consumption of finished steel grew by 3.4 per cent year-on-year at 6.015 MT during April 2017

(B) FINANCIAL PERFORMANCE:

During the year, companies' production of G.I. Pipes has been increased from 16479.193 M.T to 19095.030 M.T, whereas the production of Black Pipes has been decreased from 3742.045 M.T to 2967.09 M.T. Trading export of the Company has also increased during the previous year from 917.175 M.T to 1013.245 M.T. During the year company has also started manufacturing of Solar Structure and made a sale of 1502.149 M.T.

Total turnover of the Companies (gross & net) has been increased from Rs. 10500.95 Lakhs approx. to Rs. 12282.12 lakhs approx. & Rs. 9486.55 Lakhs to Rs. 11274.67 Lakhs respectively Overall profit of the company during the year has been also increased from Rs. 121.17 Lakhs approx. to Rs. 137.61Lakhs approx.

To sum up we can conclude that the company has delivered its best performance.

(C) OPPORTUNITIES:

Foundry Industry in India is poised to grow because of "Make in India" initiative of the Government, as the Industry is a significant contributor to engineering and manufacturing activities with almost all equipment or machinery having some casting in it.

During the year 2016-17, the Company judiciously chose the market and customer segments which helped to optimize the overall price realization. During 2016-17, the Company's focus on increasing sale to direct customers with higher customized grades sale and enhances focus on proximate and credit-free market of eastern India are being planned to increase value which can be realized from the iron market.

(D) THREATS:

There may be no such threats with regards to demand of steel products in the Market. But there always exist a risk of duplication or supply of cheap products. The glut in the global steel market, which led to an influx of cheap imports into India and a series of steps by the government to protect the domestic steel industry, might not end anytime soon.

In what indicates that threat of low-priced imports are here to stay, the world capacity utilization ratio of the alloy climbed upwards in the current year: from 66% in January 2016 to 69.6% in November 2016.

Since the import barriers set up by India are transient in nature and already under attack by exporters Japan recently dragged India to the WTO citing latter's minimum import (MIP) prices have flouted global trade rules — these can't be sustained for long either.

So only structural reforms that will help cut costs and improve productivity could enable the domestic steelmakers to acquire competitiveness in the domestic and global markets, analysts feel. Reference price, a close proxy of cost, of HR coil produced locally, for instance, was \$356.56 per tonne in January 2016, while the corresponding Chinese figure was \$308.98 per tonne.

That means the price of domestic HR coil was 15.4% higher than imported from China in January 2016. After MIP was implemented in early February, domestic HR coil price fell to below that of the Chinese variant and in August 2016, stood at \$412.31 per tonne against Chinese reference price of \$419.55 per tonne. Clearly, cost advantage enjoyed by Chinese imports in India was offset by the MIP policy. But the question is if this is sustainable.

(E) OUTLOOK:

Production of the Galvanized Pipes in 2017-18 is projected to be at the Increasing level as the previous level, whereas production of Black Steel Pipes will be more, as its demand in the international as well as domestic market is on higher side. This will result in lower sale of Galvanized pipes but increased sale of Black Steel pipes which will be more value creating for the shareholders.

In the long-term, demand for foundry grade iron is expected to improve on account of Government's focus on "Make in India".

(F) RISKS & CONCERNS:

Your Directors have put in place critical risk management framework across the Company for identification and evaluation of all the potential risks. Your Company is continuously evolving and improving systems and measures to take care of all the risk exigencies involved in the business. All the inherent risks are identified, measured, monitored and regularly reported to management. The management decides measures required to overcome these risks and ensures implementation of proper risk mitigation plans, the risk report and mitigation plans are presented to the Board of Directors periodically.

(G) INTERNAL CONTROLS:

Your company has an Independent Internal Audit Department to monitor and review and focus on the compliances of various business process. The Internal Audit report along with audit findings and tracking of process improvements and compliances is presented for review to the Audit Committee of Board of Directors.

Annexure - B to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **JTL INFRA LIMITED** ("the Company") as of 31 March 2017 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
